NOTICE OF PRIVACY PRACTICES ACKNOWLEDGEMENT AND CONSENT

I understand that, as part of my health care, this practice originates and maintains health records describing my health history, symptoms, examination and test results, diagnosis, treatment, and plans for future care or treatment. I understand that this information serves as:

- A basis for my care and treatment.
- A means of communication among the many health professionals who contribute to my care.
- A source of information for applying my diagnosis and/or surgical information to my bill.
- A means by which a third party payer can verify that services billed were actually provided.
- A means by which we carry out our health care operations.
- Appointment reminders or notifications.

I understand that I have been provided with opportunity to review a "NOTICE OF PRIVACY PRACTICES" that provides a more complete description of information uses and disclosures. I understand that I have the right to review the notice prior to signing this consent. I understand that the practice reserves the right to change our notice and practices. I understand that I have the right to request restrictions as to how my health care information may be used or disclosed to carry out treatment or to arrange payment. I understand that the practice is not required to agree to the restrictions requested. I understand that I may revoke this consent in writing, except to the extent that the practice has already taken action in reliance thereon.

I understand that if I do not consent, you cannot provide services to me.

Oklahoma law requires that we advise you that the information authorized for disclosure may include information which may be considered a communicable or venereal disease, including but not limited to Hepatitis, Syphilis, Gonorrhea, Human Immunodeficiency Virus (HIV) and Acquired Immune Deficiency Syndrome (AIDS). It may also include mental health or other sensitive information.

INFORMED CONSENT FOR DILATED EYE EXAM/S AND CONSENT FOR FLUORESCEIN ANGIOGRAM/S

INFORMATION REGARDING DILATING EYE DROPS

1. Dilating drops are used to dilate or enlarge the pupils of the eye to allow the ophthalmologist to get a better view of the inside of your eye.
2. Dilating drops frequently blur vision for a length of time which varies from person to person and may make bright lights bothersome. It is not possible for your ophthalmologist to predict how much your vision will be affected. Because driving may be difficult immediately after an examination, it's best if you make arrangements not to drive yourself.
3. Adverse reaction, such as acute angle-closure glaucoma, may be triggered from the dilating drops. This is extremely rare and treatable with immediate medical attention.
4. I have read the above and understand and all my questions, if any have been answered to my satisfaction regarding dilation. I hereby authorize Dr. Dahr and/or assistant(s) to administer dilating eye drops. The eye drops are necessary to diagnose and/or treat my condition. This consent will be valid until I revoke it.

INFORMATION REGARDING DILATING FLUORESCEIN ANGIOGRAPHY

INDICATIONS AND ADMINISTRATION

5. Angiography is a diagnostic procedure in which a rapid sequence of photographs is taken to document the blood circulation of the retina/choroid. The dye is usually injected into a vein in the arm, forearm, or hand.
6. Since the fluorescein dye is a very bright yellow, the skin may appear jaundiced for a few hours and then the yellow color disappears. The dye is excreted through the kidney causing the urine to be bright yellow for 24-36 hours.

POSSIBLE COMPLICATIONS

7. Documented adverse reactions to the dyes which can occur include: nausea, headache, upset stomach, vomiting, light-headedness, fainting, hives, and itching.

8. Even more rarely, severe allergic reactions (anaphylaxis) or bronchospasm can occur and be life threatening. I have informed my physician of any allergies to foods, iodine, or medications. **By signing this consent, I certify that I have informed my physician if I have asthma.**

9. The leakage of the fluorescein dye out of the blood vessel is painful and every effort is made to prevent this from occurring.

***** This paragraph is FOR WOMEN only.*****

10. Intravenous fluorescein is usually not administered to pregnant or nursing women, although there is no scientific evidence to suggest that it might harm the fetus or nursing babies.

By signing this consent, I certify to the best of my knowledge that I am NOT pregnant or nursing a baby.

11. I have read and understand the information about the Fluorescein Angiogram. All my questions, if any, have been answered to my satisfaction.

12. I hereby authorize and direct Dr. Dahr and/or assistants and/or their designees to provide such additional services as they may deem necessary and reasonable.

13. I understand that no guarantees of any kind regarding these procedures have been made to me.

14. I consent to the use of the above photographs and other materials for scientific purposes, provided my identity is not revealed by the pictures or the descriptive text accompanying them.

15. I hereby authorize Dr. Dahr and/or assistants to administer intravenous Fluorescein at intervals as needed for the purpose of performing angiography. This consent will be valid until I revoke it or my condition changes to the point that the risks and benefits of this medication for me are significantly different.
